

Data Sheet: Sys.tm® Intelligence

What is Sys.tm Intelligence?

Sys.tm Intelligence is an optional service within Sys.tm® that allows you to utilize AI to recognize documents by type, automatically extract information from invoices, receipts, identification documents, and more. In addition, you can ask Sys.tm Intelligence questions about information in text, images, documents and videos to identify trends and create summaries and reports.

How Can Your Organization Benefit from Sys.tm Intelligence?

Increase Productivity

Use AI query to ask Sys.tm questions about your files, documents and data.

Save Time

Use Sys.tm® Automations Robotic Process Automation (RPA) to automate manual processes.

Improve Data Accuracy

Use AI to extract data, ensuring your information is free of errors associated with manual data entry.

Trigger AI in Workflows

Use AI steps in your Sys.tm® Flows to identify invoices and receipts, extract metadata, recognize text, and more.

Improve Employee Satisfaction

Use Sys.tm Intelligence to instantly generate summaries and reports from long documents.

Easy-to-use AI

Use user-friendly Artificial Intelligence with your information management system that requires little to no learning curve.

What Are Some Example Use Cases for Sys.tm Intelligence?

Instant Answers for Decision Makers

Benefit from Sys.tm Intelligence's ability to automatically summarize, generate reports, and identify trends from large amounts of data, helping leaders make decisions more quickly.

Document Summarization

Sys.tm can automatically summarize lengthy documents, so employees can locate important documents and data more quickly.

Report Generation and Data Analysis

Using the AI query feature on documents, you can input a question like, "Which customer accounts are only using our base product?" and Sys.tm can help provide you with potential upselling opportunities.

Invoice and Expense Processing

Sys.tm Intelligence includes the ability to identify financial documents like invoices and receipts. You can include these AI flow steps in your Sys.tm Flows to automatically recognize and extract financial data whenever an invoice or receipt is uploaded to Sys.tm.
