

ARE YOU PREPARED FOR A CYBER EMERGENCY?

Security is no longer a luxury.

A Cyber Emergency is the loss or compromise of company information or systems, typically through third-party intrusion, employee sabotage, or accident.

TYPES OF CYBER EMERGENCIES

1. Security Breach

92% of malware is delivered via email.

- Verizon

2. Natural Disaster

68% of small business owners don't have a written disaster recovery plan.

- Nationwide Property & Casualty

3. Theft

21% of all files are **not protected** in any way.

- Varonis

4. Loss

43% of breach victims are small businesses

- Verizon

5. Unplanned Downtime

It can cost almost **\$400,000** for every hour a server is down.

- Statista

6. Human Error

27% of data breaches are caused by human error.

- Gallup

Companies are turning to cloud solutions to protect themselves.

The global cyber security market size is expected to reach over \$167 billion in 2020.

- Grandview Research

91% of IT departments using cloud as part of their cyber emergency solution feel confident in their security strategy.

- Zetta

54% agree that **reliability** is the most important factor in a cyber security solution.

- Zetta

Since ImageSilo® is hosted on Amazon Web Services (AWS), we offer 99.999999999% (that's 11 nines!) reliability. This means you could store 10 million files and it would take 10,000 years before you would expect to lose a single file.
