Sys.tm®

Control Your Digital Life

How much effort does it take to manage your personal records and files? How confident are you that your records are locked away safely from thieves and other bad actors? Does it ever feel too complicated to keep up with changing technologies and innovative hackers? Sys.tm changes all that! Sys.tm provides all the power of the world's best information management, Artificial Intelligence (AI), and automation in an easy-to-setup, easy-to-use product that offers you the ability to customize available features and pay only for what you actually use.

Locate Exactly What You Need the Moment You Need It

- Stop searching multiple cloud accounts, hard drives, and devices by bringing all your important records into a single, organized system.
- Use Artificial Intelligence (AI) to identify and extract important information from records to eliminate manual data entry and to create simple file names for smart digital archiving.
- Streamline your ability to find what you need in seconds using keyword and full-text search.

Get Organized to Make Faster Decisions

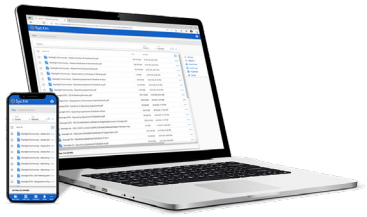

- Bring organization and security to every personal record no matter what type of file or what information it contains.
- Automatically ingest and identify files from devices, cloud storage accounts, and individual hard drives.
- Use AI queries to better understand or summarize your information and to get all your questions answered quickly.

Enjoy Peace of Mind Knowing Your Data Is Safe

- Consolidate multiple cloud storage accounts, hard drives, and devices into one secure system for everything.
- Go beyond simple password-based security to leverage encryption, multi-factor authentication, security levels, and more.
- Rest easy knowing your sensitive information and personal identity will not be shared with public AI and are secure from accidental disclosure and bad actors.

Sys.tm®

Control Your Digital Life

Sys.tm: Securely Manage Your Most Sensitive Information

Most of us don't have an organized way to manage our personal records, making it hard to find and difficult to secure. The haphazard approach leaves us vulnerable to identity theft and traps us into lengthy searches just to find answers to simple questions. From the moment you turn it on, Sys.tm is different. You can ingest and organize your files automatically—no time-consuming uploading or hand-labeling required. You can find what you need in seconds via keyword search and electronically share it with anyone you need to, and you can count on Sys.tm to keep everything safe

Track Financial, Legal, Employment, and Education Records so You Can Always Find What You Need

Think it's too complicated or expensive to build your own secure personal storage at home for sensitive information? Sys.tm makes it easy to organize and secure virtually any type of file, including sensitive financial, legal, employment, medical, or education records. Sys.tm organizes your entire digital life for less each month than you're spending on a daily cup of coffee. You can use AI to understand what's in your records, answer any question instantly, and even send data to others as needed.

Safeguard Personal Information and Vital Records to Protect Your Identity

Sys.tm integrates content management directly into your everyday routine. You can save emails and attachments, Office documents, pdfs, photos, and more. The easy-to-use platform is simple to learn and offers airtight security. Protect documents using secure login with multi-factor authentication and automatically apply detailed security protections to specific documents and groups of documents. You'll rest easy knowing you've got copies of your most important data, but it's locked away from accidental disclosure that might put your finances or identity at risk.

Organize Everything Important

One secure place for every important record in your life

Financial Records

Statements, tax documents, receipts, investments, and more.

Medical Documents

Health records, insurance, prescriptions, and provider info.

Education Records

Transcripts, diplomas, certificates, and student information.

Home & Property Files

Deeds, mortgages, warranties, insurance and important records.

Family Documents

Birth certificates, marriage licenses, legal documents and more.

Identity & Security Records

IDs, passports, Social Security cards, and other important documents.

Control Your Digital Life

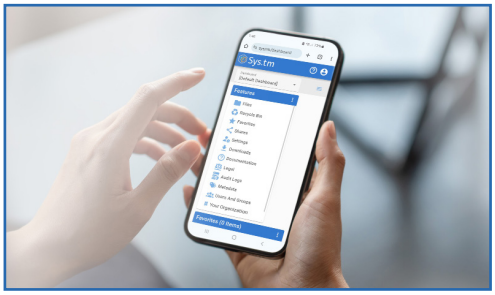

Sys.tm: Securely Manage Your Most Sensitive Information

Organize Photos, News Clippings, Personal Histories and More to Preserve Your Family Legacy

Do you have old family photographs and documents, GBs of stored digital images, or dozens of SD cards containing your family's memories? You're not alone! Sys.tm is ideal for securely storing and organizing your family's legacy. Unlike simple cloud storage, Sys.tm allows you to bring structure to files, label them with identifying information, and locate them again in seconds. You can even automatically generate personal histories for family members using AI to identify and summarize records and images for each individual.

Speed Decision Making So You Can Get Back to What Really Matters

Sys.tm offers more than just smart information management. Set up automatic processes to send information, execute tasks, streamline decisions, and more, so you save money and your life keeps moving. It eliminates the noise created by shuffling records to allow you to spend more time with your family and other loved ones.

"...most of the general public—the largest group of digital-file stakeholders in the world—is generally unaware of what digital preservation or personal digital archiving is or why they should care. Today, most people, young and old, have some sort of digital files to preserve... They need to know that their digital stuff is at risk of being lost unless they do something about it."[1]
